Highlights

Customisable: Tailor the Driver Terminal for your business

- 7" (17,7 cm) screen in a ruggedised housing
- Rear camera support (standard with TRUCK versions)
- Award Winning Navigation with TomTom Traffic & Speed Cameras*
- Users - Business Apps to customise Driver Terminal, with access to global App Center
- Developers - Fully customisable and configurable open architecture allowing bespoke usage and control
- Developers - Software developer kit (SDK) to facilitate development of bespoke business applications
- Professional Mobile Device Management **
- WiFi support for device management
- 5 megapixel camera and flashlight
- Near field communication chip (RFID)
- 3G modem

*Connectivity is not included – either respective WEBFLEET tariff needed or BYOC
**WEBFLEET subscription required

webfleet solutions

Proposition

THE CUSTOMISABLE DRIVER TERMINAL CONNECTING DRIVER AND VEHICLE DATA TO BUSINESS PROCESSES, WHILE HELPING DRIVERS TO BE SAFER ON THE ROAD.

The TomTom PRO 8275 Driver Terminals are designed to seamlessly integrate information captured in the field into back-end systems, to enable better decision making and improved customer service levels based on real-time data.

This customisable device offers new opportunities to further digitise the workflow process through WEBFLEET, and bespoke business app's, whilst staying in control of device management in the field.

It also helps the driver by providing support from award winning solutions such as navigation and traffic, and OptiDrive 360, to help them drive on the correct routes for their vehicle, and in a safest and most efficient driving style.

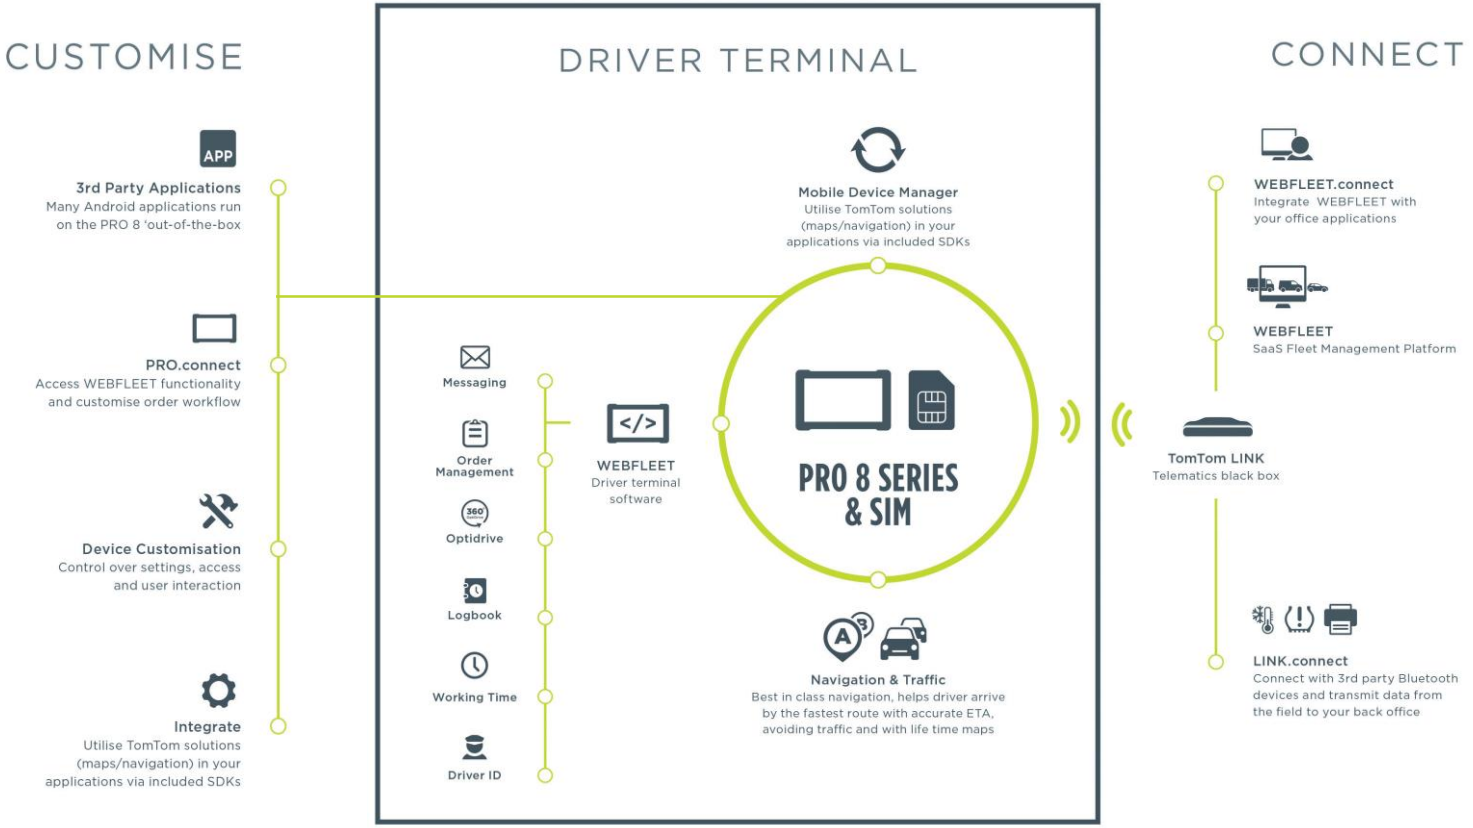
TomTom PRO 8275 Ecosystem



FEATURES

webfleet solutions

TomTom PRO 8275 Features

Navigation | Orders | Messages | Logbook | Working Time

Best-in-class navigation

TomTom Maps. Ensures your fleet always drives with the latest map.

TomTom Traffic. Always know the fastest way to your customers.

Interactive Map. Put the world at your drivers' fingertips.

3D Maps. Your drivers will always know exactly where they are.

webfleet solutions

TomTom PRO 8275 Features

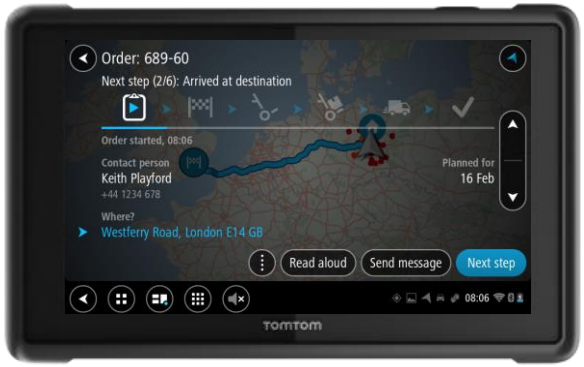
Navigation | Orders | Messages | Logbook | Working Time

Orders

Send clear order instructions directly to the Driver Terminal.

Include order type, full address, contact details and any special instructions.

Driver can then navigate straight to the destination following the fastest route.



TomTom PRO 8275 Features

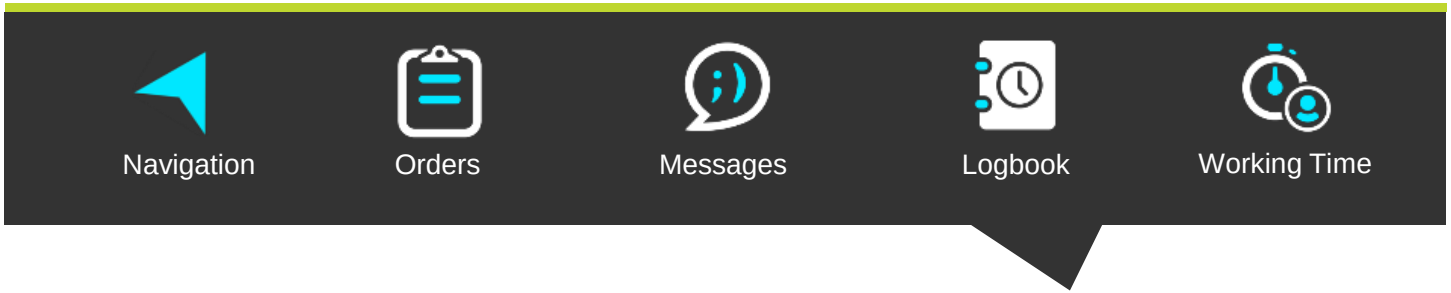
Navigation | Orders | Messages | Logbook | Working Time

Messages

Use WEBFLEET to send and receive messages about a job without calling and disturbing your mobile workforce.

TomTom PRO devices are using text-to-speech technology to read out messages, increasing your drivers' safety.

TomTom PRO 8275 Features



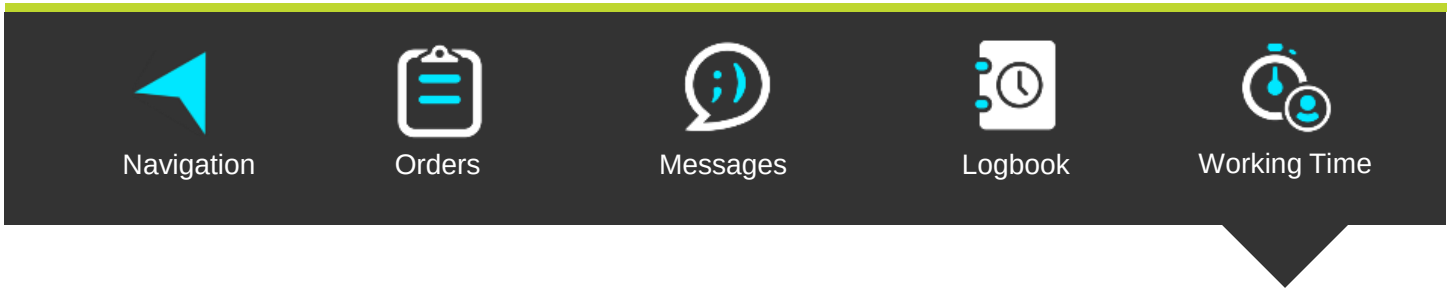
Logbook

Mileage capturing made easy with a TomTom PRO Driver Terminal. By simply touching the screen a driver can register a journey as private, commuting or business.

Paperless reporting – all data will automatically be stored in the Trip report (logbook) accessible in WEBFLEET.

Less administration for the drivers.

TomTom PRO 8275 Features



Working Time

Report working time and driving time to show your compliance.

Drivers use the device to register the moment they start work, take a break or head for home.

TomTom Traffic

Escape the traffic, arrive on time

Best in class traffic information enables your TomTom PRO 8275 to intelligently plan routes around traffic, and give accurate ETA's in WEBFLEET

TomTom Traffic gets you to your destination faster - save up to 18.5% of their journey time*.

Puts you in control - TomTom Traffic knows exactly where delays start and end, how fast the traffic is moving and how long the delays are likely to last.

Gives you detailed traffic information. Know traffic conditions as they evolve with detailed incident reports and real-time congestion information.

Offers unrivalled road coverage - More than 99% coverage of roads including secondary roads and slip roads.

"1 month of productivity per worker is lost due to traffic not flowing freely." *

"24% of driving time is wasted." *

According to independent research, products powered by TomTom Traffic reduce average drive times by 13% and up to 30% in congested areas.*

* Independent tests carried out by: Deutsche Luft und Raumfahrt Zentrum (DLR)

Truck Navigation

TomTom Truck navigation consists of two components:

1. **Truck specific routing algorithm:**
   - Favors main roads over small ones
   - Avoid small streets, sharp turns & U-turns as much as possible
   - Uses truck specific speed assumption
   - Works for all countries – independent of available truck attributes

2. **Map including truck attributes**
   Attributes available for 32x countries:
   - Height, width, length
   - Weight and weight per axle
   - Hazmat (load)

Truck specific routing throughout Europe in 32 European countries

webfleet solutions

Feature Rich, Customisable Driver Terminal

Video input

- Dedicated video cradle provides PAL or NTSC, and universal camera input support
- Standard with TRUCK versions, available as an option for standard devices
- Ideal for use with rear facing camera, also offers ‘parking guidance’
- Auto switch to camera view when reversing
- Small camera view via home screen widget

Camera

- Camera for image capture and/or barcode scanning to integrate into workflows
- Integrated flashlight

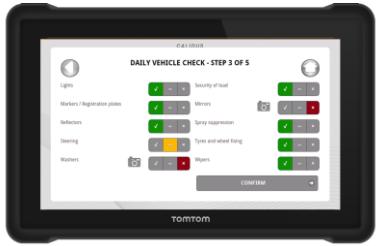
Open architecture

- Customised version of Android open source project (AOSP) built for use within business and fleet management
- Locked down features specific for business use
- Many standard Android apps are compatible (Google Play Store cannot be accessed)
- Management & Control via MDM

Data Security & Privacy

- Controlled environment for data flow and management, provides added level of security and privacy

Top 3rd Party Apps by Type



Vehicle Checks
Example VeHUB

- Vehicle checks
- Defect recording
- Photo capture
- Accident reporting
- Trailer/asset scanning

Data Capture
Example INKWRX

- Custom forms
- Integrate into back office systems
- Barcode scanning
- Signature capture

Driver Assistance
Example Truck Parking Europe

- Search EU wide for truck stops / parking
- Dedicated Truck rest areas
- Community input providing real time data and user reviews

Workflow
Example 3Kflow

- Multiple interactive elements
- Typically combining data capture with question paths
- Real time 2 way messaging i.e. status updates
- Bespoke business workflow

TomTom Bridge vs. TomTom PRO 8275

TOMTOM BRIDGE

TOMTOM TELEMATICS

TOMTOM PRO 8275

What's the different between the TomTom Bridge and a TomTom PRO 8275?

- TomTom PRO 8275 are products derived from the TomTom Bridge.
- TomTom PRO 8275 comes ready optimised for fleet management and integrated with WEBFLEET.
- The only feature that comes ready to use on the TomTom Bridge is navigation, and therefore all other functionality will need to be customised per use.
- TomTom PRO 8275 will be delivered with an MDM together with a reference implementation, meaning its ready to go for fleet management and this also reduces the development effort for 3rd party solution providers.
- Integrating applications with WEBFLEET saves bandwidth, provides a seamless user experience and enables 3rd party applications to benefit from WEBFLEET features.

AUDIENCE & USE CASE

webfleet solutions

TomTom PRO 8275 Primary Audience & Value Proposition

WHO?	USP/Offer	Tactic/Feature	Differentiator
Medium to large business Any business with drivers of HCV or engineers in vans Verticals: 1. Transport (trucks) 2. Service & Maintenance 3. Construction [Decision makers: Business Owner, Fleet Manager, Operations]	1. Customise Driver Terminal and empower drivers to collect the data from the field	.connect partners Apps, SDK, MDM	✓ Feature rich ruggedised device ✓ Customisable with trusted and proven Apps ✓ Many partner Apps to choose from in the biggest ecosystem
	2. Seamlessly integrate and connect data to enrich back-office systems. Use data to make smarter decisions and improve customer services and efficiencies	API, reporting, ETA's traffic to inform customers	✓ Easy API to enrich data sets to improve customer service, productivity and efficiency
	3. Tough ruggedised built for purpose Driver Terminal for the professional driver, keep drivers safe with Truck Navigation and OptiDrive 360	Truck navigation and OptiDrive 360 for Transport, rearview camera connection	✓ Tools for data collection and driver safety all in one terminal – fully customisable ✓ Many rich features all on one device

Value Proposition

THE CUSTOMISABLE DRIVER TERMINAL CONNECTING DRIVER AND VEHICLE DATA TO BUSINESS PROCESSES, WHILST HELPING DRIVERS TO BE SAFER ON THE ROAD.

Fully connected professional Driver Terminal, that enables a customised workflow to ensure data is captured in the field, to enrich systems for better decision making and improved customer service. Closer collaboration between driver and manager means higher performance levels of efficiency and safety can be achieved on the road.

webfleet solutions

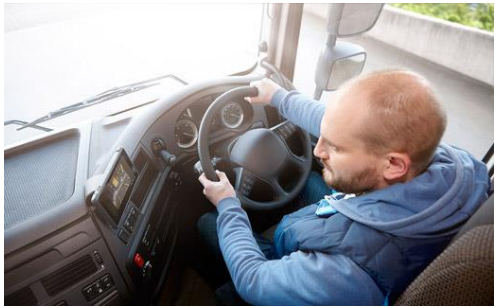
TomTom PRO 8275 Use Cases

Courier / Express Services

Transparent delivery documentation

Automate your delivery process. Provide pickup and delivery addresses to your driver, request scanning of parcels and let the customer confirm the delivery with digital signature capturing. Receive all the information, in real time, in your back-office system when a delivery process is completed.

Transport & Logistics



Freight documentation

Get real-time insight on what your trucks are carrying. Drivers can scan and send freight documents (CMR) directly to the office. This way you always know what is loaded and can speed up the invoicing process.

Standstill reporting

Reduce your fuel costs by requesting driver feedback when a vehicle stands still for a defined period of time.

Advanced vehicle checks

Use RFID tags for advanced vehicle checks to ensure your drivers comply with safety regulations.

TomTom PRO 8275 Use Cases

Service & Maintenance

Vehicle checks

Prove your compliance with road safety regulations, or simply follow best practice, by enforcing vehicle checks before mobile workers can use their vehicles.

Inventory management

Know what materials or spare parts your vehicles have onboard. This information empowers you to send the best placed driver with the right spare parts to a customer without losing time.

Technical documentation

Provide all the information your workforce may need to complete a job by storing technical documentations on the device.

People Transport

Rear view camera

Connect a rear view camera to the your driver's terminal for easier maneuvering.

Registration of on-board Sales

Register on-board sales per country to comply with country specific VAT regulations.

DEVICE MANAGEMENT & UPDATES

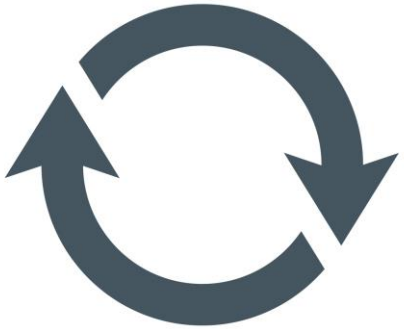
webfleet solutions

Mobile Device Manager (MDM)*

MDM included as part of the WEBFLEET subscription, enabling easy management of TomTom PRO 8275 devices.

- Remote updates of software, maps, apps, content and configuration via Webfleet Solutions servers
- Full device control such as device configuration
- Pre-defined content of all devices per account
- Less development effort for partners
- Fast deployment of content in the field

TomTom PRO 8275 MDM Quick Start Guide: available in the partner portal



*WEBFLEET subscription required

Device Update Methods

WiFi	OTA***	SD card	USB (mass storage)**
• TomTom PRO 8275 can be updated directly using WiFi • Update from device menu • Simple process for single devices • Updates in the field possible	• TomTom PRO 8275 can be updated directly using the 3G network* • Only for content configured via MDM • Update from device menu • Simple deployment for smaller files • Updates in the field possible	• Software updates and maps will be made available as a ZIP file in the MDM and partner portal (for resellers) • Recommended for multiple updates • Single download for the entire fleet (SD or USB method) • Parallel updates supported • Updates in the field possible	• Software updates and maps will be made available as a ZIP file in the MDM and partner portal (for resellers) • Recommended for bulk updates • Single download for the entire fleet (SD or USB method) • Parallel updates supported • Updates in the field possible

* Connectivity not included

** Software version 17.2 onwards

*** Available from July 2017

SPECIFICATIONS & PRICING

webfleet solutions

TomTom PRO 8275 Specification

Technical specifications	
Screen size	7” (17,7 cm)
Screen type	16:9 capacitive screen
Screen resolution	1024 x 600 pixels
Internal memory	Yes, 16 GB flash
RAM	1 GB
Processor	1.2 GHz
SD slot	Yes, mircoSD
Video line-in	3,5mm jack (cradle) [standard with TRUCK version, optional with PRO 8275]
Device size	198 (W) x 123 (H) x 25 (D) mm
Device weight	480 grams
Battery	Up to 3 hours autonomous operation
Operating temperature	-20°C to +60°C
Connectivity	Connection to WEBFLEET via LINK only, Bluetooth 2.1 and 4.0 WiFi
Map coverage	All EU countries EU 45 [Truck attributes coverage EU 32]

Additional for TomTom PRO 8275:	
Camera	5 megapixel and flashlight
Near field communication	13.56 MHz ISO 14443 compliant
Modem	3G modem – no SIM included
